Marseille, september 15<sup>th</sup> 2014

On behalf of the French Acoustical Society, I send you our best wishes for your 100<sup>th</sup> birthday , and I thank you for the numerous and valuable contributions you made for understanding and promoting Acoustics.

As many other researchers of my generation, reading your book was an early trigger for my involvement in Acoustics, and I am happy to acknowledge this today.

I hope you will continue in the same way for many years !

Sincerely,

Philippe Herzog  
President of S.F.A.
